Includes: Session Timeout and Account Protection, Main fields, Buttons and actions, Reporting impact	

Login and Organization Selection

What this page contains

- Login and Organization Selection
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Start by selecting the correct organization, then enter username and password.

Each organization has isolated data, modules, and permissions.

If Google Authenticator is enabled for the role, the OTP step appears after password validation.

After more than three wrong password attempts, login is locked on the computer for three minutes.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Main Dashboard and Navigation

What this page contains

- Main Dashboard and Navigation
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

The dashboard displays only allowed modules such as banks, deposits, revenues, expenses, reconciliations, memberships, assets, invoices, and reports.

Unavailable or unauthorized modules are hidden to keep workflows clean.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Banks and Opening Balances

What this page contains

- Banks and Opening Balances
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Create bank records with account details and opening balances.

These balances support deposit tracking, reconciliations, and reports.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Deposits and Interest Calculation

What this page contains

- Deposits and Interest Calculation
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Enter deposit amount, bank, start date, maturity date, and interest rate.

The system calculates interest and tracks maturity status.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Revenues and Collections

What this page contains

- Revenues and Collections
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Record revenue date, amount, bank, description, and category.

Accounting entries and financial reports are updated automatically where applicable.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Expenses and Payment Vouchers

What this page contains

- Expenses and Payment Vouchers
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Record expenses by organization, category, bank, and description.

Payment vouchers include organization details and email when configured.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Expense Analysis

What this page contains

- Expense Analysis
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Expense analysis shows totals by category, period, and share of total expenses.

Use exported reports for budget review and approvals.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Bank Reconciliation

What this page contains

- Bank Reconciliation
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Enter bank statement balance, book balance, outstanding checks, and deposits in transit.

The reconciliation calculates differences and prepares a printable statement.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Chart of Accounts and Journal Entries

What this page contains

- Chart of Accounts and Journal Entries
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

The chart of accounts organizes assets, liabilities, revenue, and expenses.

Journal entries connect transactions to trial balance and statements.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Fixed Assets and Depreciation

What this page contains

- Fixed Assets and Depreciation
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Register assets with cost, purchase date, category, and depreciation rate.

The system calculates depreciation and net book value.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Custody and Advances

What this page contains

- Custody and Advances
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Record custody/advance amount, employee, type, and settlement status.

Settlement updates status and accounting impact.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Memberships and Import

What this page contains

- Memberships and Import
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Manage member name, national ID, governorate, committee, and retirement date.

Import files are reviewed before final save.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Electronic Invoice

What this page contains

- Electronic Invoice
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Prepare invoices from revenue data or direct entry with customer, description, tax, and totals.

When ETA API and signing SDK are configured, invoices can be submitted and tracked.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Egyptian Tax Authority Integration

What this page contains

- Egyptian Tax Authority Integration
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Configure taxpayer information, activity code, branch code, API credentials, and signing SDK command.

No live submission occurs until required credentials and signature are complete.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Users and Permissions

What this page contains

- Users and Permissions
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Create users, assign roles, organization, and permissions.

Accounts can be enabled, disabled, or password-reset by authorized managers.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Organizations and Branding

What this page contains

- Organizations and Branding
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Update program name, organization names, emails, and login branding.

Hidden logos leave no placeholder; uploaded logos fit the designed frame.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Backup and Restore

What this page contains

- Backup and Restore
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Create password-protected encrypted backups according to role policy.

Keep the password safe because it is required for restore.

When the session times out due to inactivity, the latest entered draft fields are saved locally, excluding passwords and files.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Session Timeout and Account Protection

What this page contains

- Session Timeout and Account Protection
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

For data security, the application logs out automatically after one minute of inactivity.

Before timeout logout, non-sensitive draft fields are saved locally.

Right-click is disabled in the interface to reduce accidental copying or tampering.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Audit Log and Security Review

What this page contains

- Audit Log and Security Review
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

The audit log records actions, actor, time, route, and status.

Use filters to review activity by year, month, and hour.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Trial Balance

What this page contains

- Trial Balance
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Trial balance shows debit and credit balances before financial statements.

Review differences before issuing the balance sheet.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.

Balance Sheet and Financial Statements

What this page contains

- Balance Sheet and Financial Statements
- Main fields
- Buttons and actions
- Reporting impact

Detailed usage instructions

Select the year to generate balance sheet, revenues/expenses, and receipts/payments statements.

Review accounting linkage warnings before printing and approval.

Follow the fields from top to bottom and confirm organization, date, amount, and description before saving, printing, or approval.

Data entered on this page flows to related reports according to user permissions and the selected organization.

After saving or approving, read the confirmation or validation message to ensure the transaction is linked correctly.
